Ikrame Ibn Hayoun

Backend Python | FastAPI | PostgreSQL | Applied AI | Remote or Hybrid

ikihga2223@gmail.com | +34 682 02 76 93 | Málaga, Spain | ikrame.dev

SUMMARY

Backend Python engineer in Málaga. +3 years of professional experience and production projects. I build REST APIs with FastAPI, PostgreSQL, Redis, and SQLAlchemy for systems that have to stay consistent under concurrent requests and retries. Applied AI starts with ReckonFlow: structured LLM outputs through a closed schema, deterministic validation in code, and no authority for the model to approve or pay. I work from written specs, with AI-assisted coding and a human merge. Currently a vocational master's in AI and big data (100% online, compatible with full-time work) and preparing official cloud certifications (GCP, AWS). DAW with honors (Matrícula de Honor), EQF Level 5. Open to remote or hybrid backend and applied-AI roles.

SKILLS

Backend Python. Python, FastAPI, REST APIs, PostgreSQL, relational databases, SQL, Redis, SQLAlchemy, Alembic, Pydantic, JWT, Celery, asynchronous processing, distributed workflows, Stripe, pytest, unit testing with pytest, mypy

Applied AI. structured LLM outputs, closed schemas, RAG, hybrid retrieval, LangGraph, AI agents, PydanticAI, Groq, prompt engineering, guardrails against prompt injection

Delivery. Git, CI/CD, GitHub Actions, Docker, Docker containers, Docker Compose, production deployment, Prometheus, observability, React, JavaScript, TypeScript, Node.js, Express, Vitest, Playwright, DataFlex, Power Apps, Power Fx

Microsoft 365. SharePoint Framework (SPFx), SharePoint REST API, Power Automate, Microsoft Lists, Microsoft 365 Migration Tool, PnP PowerShell, Entra ID

Coursework in progress. PySpark, DataFrames, Spark, NumPy, Pandas, TensorFlow, PyTorch, Kafka, AWS, Google Cloud (GCP), cloud computing

PROJECTS

ReckonFlow GitHub | Docs — Aug 2026

Headless FastAPI REST API for corporate travel. Relational PostgreSQL database, Redis, immutable double-entry ledger, Decimal money. Production deployment with interactive docs.

- Redis idempotency and PostgreSQL row locks (FOR UPDATE) so a retried confirm cannot double-post. Asynchronous processing via HTTP 202 background jobs.
- Receipt extraction with PydanticAI and Groq. Closed schema extra=forbid as a guardrail against prompt injection; structured LLM outputs are validated in code before any database write. The model cannot approve or pay.
- Hybrid retrieval (RAG-style): SQL prefilter, RapidFuzz, hashed-token vectors, Reciprocal Rank Fusion. Unit testing with pytest, CI/CD, Prometheus observability.

Validata — 2026 - Present

Co-developed B2B SaaS. Batch lookup of Spanish companies by razón social against official BORME records. FastAPI, Celery distributed workflows, Redis, PostgreSQL, React. Original file columns are preserved on export.

- Company-name column inference, atomic Redis quotas, HMAC download tokens, Stripe test Checkout, waitlist persistence, GitHub Actions CI.
- Legal-form mismatch (S.L. vs S.A.) stays REVISION_SUGERIDA.

OTHER PROJECTS

import-resolve-cli GitHub | PyPI — Aug 2026

PyPI CLI and Git merge driver for Python import conflicts. AST, zero runtime deps, pytest/mypy/ruff CI. Not a product API.

english-spanish-web-localization GitHub | skills.sh — 2026

skills.sh skill with public source. locale_guard checks JSON catalogs (en-GB, en-US, es-ES, es-419). Not a product API.

MyPlaythrough GitHub | Demo — Sep 2025 - Jun 2026

DAW capstone, 10/10. React, Express, PostgreSQL, Docker Compose, Vitest.

Live Event Radar GitHub | Demo — 2026

React, TypeScript, Vitest, Playwright. Telemetry is mocked.

Aiba GitHub Jul 2026

Local-first Windows productivity widget built with Electron, React 19, TypeScript and a secure IPC preload bridge. No cloud account.

WORK EXPERIENCE

DATA CONTROL Málaga, Spain | Remote
Software Developer Intern *Mar 2026 - Jun 2026*

- Developed internal applications in a DataFlex environment and in Python: data access, business logic, and ongoing customization.
- Built a Moodle learning platform from scratch: install, course structure, users and roles, a relational SQL database, and CSS/UI theming.

EY Global Delivery Services Málaga, Spain | Hybrid
Executive Assistant *Jan 2025 - Mar 2026*

- Built a Power App (Power Fx) that ran the CNS Christmas raffle end to end: registration and number assignment in one place, instead of chasing it over email or Teams.
- Coordinated strategic client visits in Málaga end to end: agendas, logistics, and the on-site experience - days that often shaped whether a deal moved forward.
- Ran day-to-day ops - travel, Concur, Outlook, Teams, SharePoint, and the firm's internal tools - in a global professional-services setting.

EC Azafatas Málaga, Andalusia, Spain | On-site
Brand Ambassador *Feb 2026*

- Ran product tastings and stand logistics in high-traffic retail, including end-of-day inventory for the agency.

Conciencia Fundraising Málaga, Andalusia, Spain | Hybrid
Accounting & Administrative Assistant *Nov 2024 - Dec 2024*

- Tracked donors and fundraisers in Drive, Outlook, Evergiving, Factorial, Odoo, and Looker; recorded travel and expense costs for internal cost control.

SYLVIS PROFESIONAL COSMETIC Málaga, Andalusia, Spain | On-site
Administrative Assistant *Mar 2024 - Oct 2024*

- Reconciled bank accounts, posted company and import invoices, and tracked vehicle and import costs in Excel.

EDUCATION

IES Zaidín Vergeles Sep 2026 - Present
Artificial intelligence and big data, Vocational master's (máster de FP), In progress. EQF Level 5 *Granada, Spain*

100% online: PySpark, DataFrames, Spark, NumPy, Pandas, TensorFlow, PyTorch, Kafka, distributed computing, and ML.

CESUR Este, Málaga Sep 2024 - Jun 2026
Web Application Development, Higher Vocational Degree (DAW), Matrícula de Honor. EQF Level 5 *Málaga, Spain*

I.E.S. Politécnico Jesús Marín Sep 2022 - Jun 2024
Business Administration and Management, Vocational Diploma, Graduated with Honors. EQF Level 4 *Málaga, Spain*

CERTIFICATIONS

Official cloud certifications (GCP, AWS) In preparation

In preparation. Not obtained. No production cloud-platform deployment claimed.
